WORK EXPERIENCE

Syvora

Associate System Analyst

July 2025 - Present

- Built and maintained end-to-end full-stack applications using **React.js, Next.js, TypeScript, Node.js, Go (Golang), Python, PostgreSQL, Prisma, and REST APIs**, delivering scalable, high-performance solutions.
- Developed **Agentic AI** applications using **Python, LLM APIs, RAG, tool-calling, MCP, and workflow orchestration**, enabling intelligent automation and AI-powered engineering workflows.
- Engineered scalable backend services in **Go** and **Node.js**, implementing clean architecture, authentication, caching, asynchronous processing, and performance optimizations.
- Designed and implemented an **AI-powered onboarding and training platform** using **OpenClaw AI** automating employee onboarding, knowledge delivery, progress tracking, and reducing manual effort.
- Contributed to **blockchain** and distributed systems projects by developing smart contract integrations, backend APIs, and frontend features while collaborating across AI, backend, and frontend teams to deliver production-ready solutions.

EDUCATION

Acropolis Institute of technology and research, Indore

Computer Science Engineering - 8.24

November 2022 - Present

- Strong foundation in **operating systems, DBMS, and computer networks**
- Hands-on experience with **programming, and software development concepts**

Montfort Sen. Sec. School, Mandla

Senior Secondary (Class XII) – PCM - 92.8

March 2008 - April-2022

- Secured Rank 1 in Class XII (CBSE Board) across the school

PROJECTS

Veritas-AI

May 2026 - June 2026

- Built a production-grade AI agent platform using **Node.js, TypeScript, Express, and LLM APIs** with **RAG, ReAct tool calling**, conversational memory, and **SSE streaming** for real-time AI interactions.
- Implemented **semantic search**, citation verification, caching, MCP integration, guardrails, image ingestion, and observability to deliver accurate, reliable, and scalable AI responses.

FinCore

April 2026 - April 2026

- Built secure finance backend API using Node.js, Express, PostgreSQL, and Prisma with JWT authentication & role-based access control (RBAC)
- Designed scalable REST architecture with controllers, services, and middleware, supporting transaction management, validation, and rate-limited APIs

HirePrep AI

March 2026 - April 2026

- Built AI-powered full-stack interview platform using React, TypeScript, Node.js, and LLM APIs for real-time question generation & evaluation
- Implemented voice interactions (STT/TTS) with timed workflows, scoring, hints, and feedback system
- Developed in-browser coding environment with AI-based code analysis.

SKILLS

- IT Skills : Java (Core), Golang, JavaScript, Python,NodeJS, ExpressJS, ReactJS, NextJS, Bootstrap, TailwindCSS, Blockchain(solidity), SQL, MongoDB, Git-Github, Agentic-AI
- Core Subjects : Object-Oriented Programming (OOPM), Database Management Systems (DBMS), Compiler Design, Computer Networking

CERTIFICATE

NPTEL Certification

- Certification in Database Management Systems (2024)
- Certification in Computer Networking (2025)
- Certified in MongoDB by MongoDB University (2024-25)
