Dear Hiring Manager,

I am writing to express my interest in the Software Engineer / Full Stack Developer position at your organization. I have one year of professional experience as an Associate System Analyst at Syvora, where I have worked on building scalable web applications, backend services, AI-powered solutions, and modern software systems. Alongside my professional experience, I am completing my B.Tech in Computer Science Engineering, which has strengthened my software engineering fundamentals.

During my time at Syvora, I have worked with technologies including React.js, Next.js, Node.js, Golang, MongoDB, SQL, REST APIs, and modern development practices. I have also gained hands-on experience with Generative AI, AI agents, Retrieval-Augmented Generation (RAG), workflow automation, and integrating Large Language Models into real-world applications.

Beyond my professional work, I enjoy building projects that solve practical problems. Some of my notable projects include **PropVideo AI**, **Meeting Mind**, and **Veritas AI**, where I explored AI-driven automation, intelligent document processing, and productivity solutions. These projects have strengthened my ability to design scalable architectures, write clean and maintainable code, and quickly adapt to new technologies.

What excites me most about this opportunity is the chance to contribute to impactful products while continuing to grow as a software engineer. I enjoy solving challenging technical problems, collaborating with teams, and continuously learning new technologies to deliver high-quality software.

I would welcome the opportunity to discuss how my experience, technical skills, and passion for software development can contribute to your team. Thank you for considering my application. I look forward to hearing from you.

Sincerely,

Sajal Mishra
